

Manulife Investment-Linked Policy Sub-Funds (for Fortune Accumulator)

Welcome Message

29 March 2018

Dear Customer

This booklet contains the Annual Report for our Investment-Linked Policy Sub-Funds, which includes an overview of each fund's investment objectives and performance.

To ensure that you are best positioned to meet your financial goals, we encourage you to review your investments regularly and maintain a well-diversified portfolio. We will continue to be vigilant in our choice of investments by looking out for the best opportunities available to help you grow your wealth.

If you have any questions about your policy or investments, please speak to your Manulife Representative or contact our Client Services Executives at 6833-8188. Thank you for trusting Manulife with your investment needs, and we look forward to continue supporting you in the years ahead.

Yours faithfully

Dr Khoo Kah Siang
President & Chief Executive Officer
Manulife Singapore

Register of Representatives - You may logon to the Monetary Authority of Singapore (“MAS”) website (www.mas.gov.sg) to conduct a background check of your Manulife Financial Consultant.

The information relating to the Investment-Linked Policy (“ILP”) sub-fund is compiled by Manulife (Singapore) Pte. Ltd., solely for general information purposes. It does not constitute an offer, invitation, solicitation or recommendation by or on behalf of Manulife (Singapore) Pte. Ltd. to any person to buy or sell any ILP sub-fund.

All overviews and commentaries, if provided, are intended to be general in nature and for current interest. While helpful, these overviews and commentaries are no substitute for professional tax, investment or legal advice. Investors are advised to seek professional advice for their particular situation. The information provided herein does not take into account the suitability, investment objectives, financial situation or particular needs of any specific person. Investors should consider the suitability of any ILP sub-fund based on his or her investment objectives, financial situation and particular needs before making a commitment to subscribe for units, shares or any other interests in any ILP sub-fund.

Investments in ILP sub-funds are not deposits in, guaranteed or insured by Manulife (Singapore) Pte. Ltd., its partners or distributors. The value of units in any ILP sub-fund and any income accruing to it may rise as well as fall, which may result in the possible loss of principal amount invested. Past performance of any ILP sub-funds or fund managers and any prediction, projection or forecast on the economy or markets are not necessarily indicative of the future or likely performance of the ILP sub-funds or the fund managers. Investors should read the relevant Manulife Fund Summary (for Fortune Accumulator) and Product Highlights Sheet before deciding whether to subscribe for or purchase units in any ILP sub-funds.

Investment and Market Review***

While long-term bond yields have risen from their lows in 2016, it is becoming clear these rate advances are likely to be moderate and tempered. With global growth slowly returning, the economic environment is likely to be supportive of dividend investing in Asia.

It is vital in this environment to differentiate between dividend-investing and yield-investing, the latter of which chases yield for yield's sake. Our approach has remained consistent in that we focus on the former and invest by focusing on the future stream of dividends of companies while ensuring that these streams are both sustainable and growing.

We continue to be invested in a diversified portfolio of 'Dividend Cows' and 'Growers', with our preferred areas

of investment in blue-chip names in Australia, Hong Kong and Taiwan across sectors such as telecoms, industrials, healthcare and technology companies, although we have recently been trimming our exposure to select names in interest rate-sensitive sectors. We also remain comfortable with our exposure in Hong Kong property stocks, mostly in the office segment, with quality names trading at attractive discounts to NAVs and where fundamentals are still supportive.

Technology stocks such as Alibaba and Tencent have done exceptionally well but we do not invest in these names and are unlikely to do so in future as they do not fit into any of our three dividend categories – Dividend Cow, Grower or Surprise. Although this has negatively-impacted the Fund's relative performance, these companies pay low dividends or, in the case of Alibaba, no dividends at all and are unlikely to grow their future dividend streams materially. These stocks do not meet our criteria for yield-investing and we are not inclined to depart from our investment philosophy to chase these recent winners.

Given this mixed medium-term backdrop and aggregate valuations for markets that are at above average levels, we continue to focus on bottom-up stock selection and picking longer term structural winners. This is rather than chasing the shorter-term cyclical momentum driving markets today. Rapidly shifting business models and trade patterns means that it is more important than ever to look forward at the growth opportunities of tomorrow rather than remain anchored in today's incumbent market heavyweights. We continue to see attractive growth opportunities in the technology sectors – both hardware and e-commerce – and some of the more domestically-focused service sectors and financials across the region that are benefiting from rising income levels and evolving consumption patterns.

Market Outlook and Investment Strategy***

As bottom-up dividend investors, we will continue to focus on identifying businesses that can differentiate themselves and are beneficiaries of structural themes including trends in demographics, innovation and disruption when seeking to invest in companies that can continue to sustain their cashflows and yields or their earnings growth. We believe that investing in a diversified portfolio of Dividend Cows, Growers and Surprises remains key to sustained long-term outperformance.

We are becoming wary that rallies are centred on a narrow segment of the market, and in general, a lack of market breadth is always worrying as it typically precedes a significant correction in markets. At this stage of the market cycle, it is important for investors to be conscious of where there might be signs of irrationality and exuberance.

As observed in the past, dividend investing tends to deliver strong outperformance following periods of such market irrationality. Therefore through dividend investing in Asia, investors can continue to exercise prudence and diversification whilst maintaining exposure to Asian equity markets.

Fund Objective

The ILP Sub-Fund invests all or substantially all its assets into Legg Mason Western Asset Global Bond Trust ("Underlying Fund"), which is a unit trust constituted in Singapore and inception on 2 November 1998. The investment objective of the Underlying Fund is to maximize total returns in Singapore Dollar terms over the longer term by investing in a portfolio of high quality debt securities of Singapore and major global bond markets such as the G10 countries and Australia and New Zealand. The Underlying Fund aims to outperform the benchmark.

*FTSE World Government Bond Index ex Japan (hedged to S\$).

Prior to 3 January 2005, the benchmark against which the performance of the ILP Sub-Fund was measured was the Citigroup World Government Bond Index (S\$). The reason for the change is because the Citigroup World Government Bond Index ex Japan better reflects the investment focus and strategy of the Underlying Fund.

- Performance is in SGD as at 31 December on bid-to-bid basis, with any income or dividends reinvested.
- Performance figures for 3 months till 1 year show the % change, those exceeding 1 year show the average annual compounded return.

Investment and Market Review***

Global bonds posted mixed returns in December. The US Federal Reserve (Fed) raised rates as expected and kept its outlook for three rate hikes in 2018 unchanged. The US tax reform bill was finally signed into law on December 22. With inflation data remaining subdued, the US yield curve flattened as short rates rose and intermediate- to long-term rates declined. European yields rose on continued eurozone growth optimism and increasing expectations that the European Central Bank's (ECB) recent quantitative easing (QE) extension might be its last, despite the ECB reiterating its willingness to continue asset purchases after September 2018. In Italy, rising political uncertainty ahead of the March general election pushed yields sharply higher. Mexican assets continued to underperform with the Mexican peso as one of only a handful of currencies to underperform the US dollar in December. Credit markets remained firm into the year-end.

Market Outlook and Investment Strategy***

In our opinion, the current steady but unspectacular global growth backdrop has not materially changed. US inflation has remained low even though the economy has improved. With tighter credit spreads and US dollar depreciation, financial conditions have become more accommodative despite higher short-term rates. We think the Fed will continue with a few more slow, gradual and cautious hikes in 2018. We remain tactical with respect to overall portfolio duration and yield-curve positioning. We maintain a long US duration position in global portfolios with short-duration positions in core European bonds and Japan.

Eurozone GDP is growing at its fastest pace in seven years, with momentum, it seems, for further improvement. The growth dynamic is broad-based, with the reliance on net exports being dissipated as domestic demand has strengthened. Furthermore, it is not only the “core” economies that are benefitting; the periphery economies are also on an upward trajectory. We believe bund yields will eventually correct to reflect the possibility of policy normalization post 2019 but, in the near term, yields are unlikely to rise materially. We remain constructive on the Italian economic recovery story but less so on valuations and have reduced Italian overweight exposures accordingly. As we approach elections in the first half of 2018, the market may look to price in some additional risk premium and we will look to re-establish a more significant position.

We continue to look for opportunities to benefit from market anomalies. Our focus remains on longer-term fundamentals with diversified strategies to manage risk.

Fund Objective

The ILP Sub-Fund invests all or substantially all its assets into Manulife Global Fund – Global Equity Fund (“Underlying Fund”), which is a sub-fund of Manulife Global Fund (“MGF”). MGF is constituted in Luxembourg. The investment objective of the Underlying Fund is to achieve capital growth from a balanced portfolio of international securities. The Underlying Fund is designed as a relatively lower risk way of participating in world stock markets and offers an alternative to the other, more aggressive, regional investments. The benchmark against which the ILP Sub-Fund’s performance will be measured is the MSCI World Index.

Fund Performance

Fund Performance/ Benchmark returns	Golden Worldwide Equity Fund	MSCI World Index
3 months	+1.81%	+3.83%

Investment and Market Review

During the year, the U.S. economy steadily improved as consumer confidence rose to a near 17-year high, unemployment reached a 17-year low and wage growth accelerated. Global earnings growth expanded, with Europe in particular showing strength. While growth improved, inflation remained low, allowing global monetary policy to remain accommodative. Tax reform optimism and the late-quarter passing of the U.S. administration’s tax reform bill further fueled the global equity market rally. The emerging markets was the best-performing region as a result of improving company earnings and a weakening U.S. dollar. U.S. equities also performed well, posting strong returns with low volatility. For the first time in its history, the S&P 500 Index delivered 12 consecutive positive returns during a calendar year. Information Technology was the best-performing sector, while the Energy and Telecommunication Services sectors lagged. After a rough start to the year, oil prices rebounded in the second half, ending 2017 at their highest level in nearly two years as a result of production cuts by the Organization of the Petroleum Exporting Countries and increased global demand.

Market Outlook and Investment Strategy

Global markets continue to fare well, with most key indices rising in December. The U.S. had a tremendous year, up over 20%, but struggled on a relative basis versus its international peers, with European markets up 26%, Japan up 24% and emerging markets up 38% (all in U.S.-dollar terms). Emerging markets in particular benefited from weakness in the U.S. dollar. The implication of this performance is that most equity price/earnings ratios are higher than historical averages, and one would need to head back to the early 2000s to see comparable price/earnings multiples.

In addition, debt levels have risen, even as profit margins appear to be near peak levels. This is cause for concern, as current valuations have priced-in strong earnings growth – a perspective that we believe might be somewhat optimistic. Valuation concerns aside, we believe there are additional macroeconomic issues that should be in focus for investors. Although the U.S. Federal Reserve Board appears committed to interest rate increases, we believe its commitment to data dependency is questionable. We expect little material inflation in the U.S. and remain concerned about a declining Consumer Price Index. U.S. political uncertainty contrasts with that of the eurozone where, aside from ongoing Brexit negotiations, France's initiation of structural reforms has added to political stability. It is against this background of renewed stability that we removed the Fund's currency hedges earlier in the year. Meanwhile, a sense of unease remains over North Korea's nuclear situation.

We believe markets are currently in a “valuation-rich environment.” Against this backdrop, we continue to focus on companies that have enduring businesses, strong management teams with solid track records of effective capital allocation, strong balance sheets and sustainable free cash flow. We continue to view the U.S. Financials sector positively, although we remain cautious of European firms within the sector. We also continue to favor sustainable, quality franchises within the Consumer Staples sector.

We believe the biggest potential market risks stem from high global valuations and high debt levels. In addition, with central banks generally signaling the end of unconventional monetary policy, we are concerned that the transition, if not executed well, could have a negative impact on capital markets. We maintain a negative view of the Utilities sector amid high valuations, which are a result of low interest rates.

Notes To The Accounts

1. Significant Accounting Policies

- (a) **Basis of Accounting**
The accounts of the Manulife Investment-Linked Policy sub-funds, expressed in Singapore dollars, are prepared under the historical cost convention except for the investments which are stated at market value.
- (b) **Cash and Cash equivalents**
Cash and cash equivalents comprise cash deposited with financial institutions that are subject to an insignificant risk of changes in value.
- (c) **Investments**
Unit trusts are valued at the market prices on 31 December 2017.
- (d) **Investment Income**
Dividend income is taken up in the financial statements when it is declared payable.

Interest income is recognised using the effective interest method.
- (e) **Foreign Currencies**
Transactions arising in foreign currencies during the period are converted at rates closely approximating those ruling on the transaction dates. Foreign currencies denominated monetary assets and liabilities are translated into local currency at exchange rates ruling on the financial statement date. All exchange differences arising from conversion are included in the capital account.
- (f) **Realised Gain/(Loss) on Sale of Investments**
Gain/(loss) on sale of investments is determined at average cost and includes realised foreign exchange gains and losses.

2. Units

The number of units issued as of valuation date 31 December 2017:

Opinion

We have audited the accompanying financial statements of the investment-linked sub-funds ("Funds") of Manulife (Singapore) Pte. Ltd. (the "Company"), which comprise the statement of assets and liabilities as at 31 December 2017, the Capital Account for the financial year then ended, and notes to the accounts, including a summary of significant accounting policies set out in Note 1 to the accounts.

In our opinion, the accompanying financial statements of the Funds of the Company for the financial year ended 31 December 2017, are properly drawn up in accordance with the stated accounting policies set out in Note 1 to the accounts.

Basis For Opinion

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements of the Funds section of our report. We are independent of the Company and the Funds in accordance with the Accounting and Corporate Regulatory Authority ("ACRA") Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for other information. The other information comprises the Message from the President and Chief Executive Officer, and fund reports included in pages 1 to 23, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Emphasis of Matter – Basis of Accounting

We draw attention to Note 1 to the accounts, which describes the basis of accounting. The financial statements are prepared to assist the Company to comply with the requirements of the Monetary Authority of Singapore (“MAS”) Notice 307 Investment-Linked Life Insurance Policies. As a result, the financial statements may not be suitable for another purpose. Our report is intended solely for the use of the Company. Our opinion is not modified in respect of this matter.

Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the stated accounting policies, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Funds’ ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Funds or to cease operations, or has no realistic alternative but to do so.

The directors’ responsibilities include overseeing the Funds’ financial reporting process.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent Auditor's Report For The Year Ended 31 December 2017

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
